

The Pipeline from Car Accidents to Public Transportation

Pedro Kawamura, Owen Seibold

Research Question: How do traffic accidents, subway lost time rates, and subway ridership data affect the use of public transportation between New York boroughs from 2022 to 2023?

1.71 people
on average are
injured per
accident

30150.5 employees
on average are
affected by lost time
rates

Conclusion: Car accidents
do not lead to more public
transportation usage
